### Note 1. Basis of Presentation

### **Nature of Business**

NCS Multistage Holdings, Inc., a Delaware corporation, through its wholly owned subsidiaries and subsidiaries for which it has a controlling voting interest (collectively referred to as the "Company," "NCS," "we," "our" and "us"), is primarily engaged in providing engineered products and support services for oil and natural gas well construction, well completions and field development strategies. We offer our products and services primarily to exploration and production companies for use both in onshore and offshore wells. We operate through service facilities principally located in Houston and Odessa, Texas; Tulsa, Oklahoma; Calgary, Red Deer, Grande Prairie and Estevan, Canada; Neuquén, Argentina and Stavanger, Norway.

## **Basis of Presentation**

Our accompanying condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States ("GAAP") for interim financial information and with the instructions to Form 10-Q and Article 8 of Regulation S-X of the Securities Exchange Act of 1934, as amended, issued by the Securities Exchange Commission ("SEC") and have not been audited by our independent registered public accounting firm. Certain information and footnote disclosures normally included in financial statements prepared in accordance with GAAP have been condensed or omitted. These condensed consolidated financial statements should be read in conjunction with our financial statements and related notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2022 ("Annual Report"). We consolidate Repeat Precision, LLC and its subsidiary ("Repeat Precision"), a 50% owned entity, with operations in the United States and Mexico, because NCS has a controlling voting interest. The other party's ownership is presented separately as a non-controlling interest. In the opinion of management, these condensed consolidated financial statements necessary for a fair statement of the interim periods presented. The results of operations for interim periods are not necessarily indicative of those for a full year. All intercompany accounts and transactions have been eliminated for purposes of preparing these condensed consolidated financial statements.

#### **Significant Accounting Policies**

Our significant accounting policies are described in "Note 2. Summary of Significant Accounting Policies" in our Annual Report.

### **Recent Accounting Pronouncement**

In June 2016, the FASB issued ASU No. 2016-13, *Financial Instruments-Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments.* This ASU introduces a new impairment model that is based on expected credit losses rather than incurred credit losses for financial instruments, including trade accounts receivable. It requires an entity to measure expected credit losses for financial assets held at the reporting date based on historical experience, current conditions and reasonable and supportable forecasts. The new standard was to become effective for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years. In November 2019, the FASB issued ASU No. 2019-10, which deferred the effective dates for certain accounting guidance. The effective date of ASU No. 2016-13 remained the same for public business entities that are SEC filers, except for entities who are deemed smaller reporting companies ("SRC"). The effective date for SRCs began during the first interim period of fiscal years after December 15, 2022. NCS qualifies as an SRC. We adopted ASU No. 2016-13 on January 1, 2023, with no material impact on our condensed consolidated financial statements.

#### Note 2. Revenues

### **Disaggregation of Revenue**

We sell our products and services primarily in North America and in selected international markets. Revenue by geography is attributed based on the current billing address of the customer. The following table depicts the disaggregation of revenue by geographic region (in thousands):

						Months Ended ptember 30,		
	 2023		2022		2023		2022	
United States								
Product sales	\$ 5,200	\$	8,217	\$	20,202	\$	24,551	
Services	2,812		3,294		8,511		8,171	
Total United States	8,012		11,511		28,713		32,722	
Canada								
Product sales	21,531		25,748		54,062		54,455	
Services	6,613		9,011		19,074		21,681	
Total Canada	 28,144		34,759		73,136		76,136	
Other Countries								
Product sales	555				1,885		543	
Services	1,568		2,600		3,490		6,045	
Total Other Countries	 2,123		2,600		5,375		6,588	
Total								
Product sales	27,286		33,965		76,149		79,549	
Services	10,993		14,905		31,075		35,897	
Total revenues	\$ 38,279	\$	48,870	\$	107,224	\$	115,446	

#### **Contract Balances**

If the timing of the delivery of products and provision of services is different from the timing of the customer payments, we recognize either a contract asset (performance precedes contractual due date in connection with estimates of variable consideration) or a contract liability (customer payment precedes performance) on our condensed consolidated balance sheet.

The following table presents the current contract liabilities as of September 30, 2023 and December 31, 2022 (in thousands):

Balance at December 31, 2022	\$ 51
Additions	423
Revenue recognized	(5)
Balance at September 30, 2023	\$ 469

We currently do not have any contract assets or non-current contract liabilities. Our contract liability as of September 30, 2023 and December 31, 2022 is included in current liabilities on the condensed consolidated balance sheets. Our performance obligations for our product and services revenues are satisfied before the customer's payment; however, prepayments may occasionally be required. Revenue recognized from the contract liability balance was less than \$0.1 million and \$0.4 million for the three months ended September 30, 2023 and 2022, respectively, and less than \$0.1 million and \$2.0 million for the nine months ended September 30, 2023 and 2022, respectively.

### **Practical Expedient**

We do not disclose the value of unsatisfied performance obligations when the related contract has a duration of one year or less. We recognize revenue equal to what we have the right to invoice when that amount corresponds directly with the value to the customer of our performance to date.

## Note 3. Inventories, net

Inventories consist of the following as of September 30, 2023 and December 31, 2022 (in thousands):

	•	nber 30, 023	December 31, 2022
Raw materials	\$	2,957	\$ 2,135
Work in process		4	38
Finished goods		39,074	34,869
Total inventories, net	\$	42,035	\$ 37,042

## Note 4. Other Current Receivables

Other current receivables consist of the following as of September 30, 2023 and December 31, 2022 (in thousands):

	Se	eptember 30, 2023	December 31, 2022
Current income tax receivables	\$	1,074	\$ 1,868
Employee receivables		253	354
Other receivables		2,710	1,504
Total other current receivables	\$	4,037	\$ 3,726

Employee receivables primarily consist of amounts paid by us for foreign withholding tax paid on behalf of employees working on international assignments, which is expected to be reimbursed to us by the employees when refunded as foreign tax credits on home-country tax returns. The primary components of the other receivables balances include \$1.9 million due as of September 30, 2023, pursuant to a research and development contract, for which there is a corresponding accounts payable related to outside service provider costs incurred, as well as amounts associated with U.S. employee retention credit ("ERC") claims totaling \$0.9 million at December 31, 2022, of which \$0.7 million was collected in September 2023, along with \$0.1 million of interest, with a remaining receivable of \$0.1 million at September 30, 2023. In addition, we had a \$0.7 million receivable at December 31, 2022 associated with our technical services and assistance agreement with Special Oilfield Services Co., LLC. This receivable, net of withholding tax, was collected in June 2023. In 2023, we began recording the receivable earned associated with this technical services and assistance agreement quarterly, for which the receivable totaled \$0.5 million as of September 30, 2023.

## Note 5. Property and Equipment

Property and equipment by major asset class consist of the following as of September 30, 2023 and December 31, 2022 (in thousands):

	s	eptember 30, 2023	December 31, 2022
Land	\$	1,589	\$ 1,592
Building and improvements		7,420	7,462
Machinery and equipment		19,401	18,156
Computers and software		2,344	2,107
Furniture and fixtures		707	748
Vehicles		273	262
Right of use assets - finance leases		12,423	11,231
Service equipment		57	57
		44,214	 41,615
Less: Accumulated depreciation and amortization		(20,740)	(18,844)
		23,474	 22,771
Construction in progress		916	545
Property and equipment, net	\$	24,390	\$ 23,316

The following table presents the depreciation expense associated with the respective income statement line items for the three and nine months ended September 30, 2023 and 2022 (in thousands):

		nths Ended 1ber 30,			ths Ended ber 30,		
	 2023 2022				2023		2022
Cost of sales							
Cost of product sales	\$ 414	\$	344	\$	1,158	\$	1,068
Cost of services	144		118		443		414
Selling, general and administrative expenses	443		420		1,291		1,260
Total depreciation	\$ 1,001	\$	882	\$	2,892	\$	2,742

We evaluate our property and equipment for impairment whenever changes in circumstances indicate that the carrying amount of an asset group may not be recoverable. As of September 30, 2023, we evaluated potential triggering events, including the Texas Matter discussed in "Note 9. Commitments and Contingencies" and the decline in the quoted price of our common stock. However, we determined that there were no triggering events that indicated potential impairment of our property and equipment for the three and nine months ended September 30, 2023 and 2022, respectively, and accordingly no impairment loss has been recorded.

## Note 6. Goodwill and Identifiable Intangibles

The carrying amount of goodwill is summarized as follows (in thousands):

	S	eptember 30, 2023	December 31, 2022
Gross value	\$	177,162	\$ 177,162
Accumulated impairment		(161,940)	(161,940)
Net	\$	15,222	\$ 15,222

We perform an annual impairment analysis of goodwill as of December 31, or whenever there is a triggering event that indicates an impairment loss may have been incurred. As of September 30, 2023 and 2022, we did not identify any triggering events for Repeat Precision, our only reportable unit with goodwill, that would indicate potential impairment. Therefore, no goodwill impairment has been recorded for the three and nine months ended September 30, 2023 and 2022, respectively.

Identifiable intangibles by major asset class consist of the following (in thousands):

		September 30, 2023													
	Estimated		Gross												
	Useful		Carrying		Carrying		Carrying		Carrying		Carrying		Accumulated		Net
	Lives (Years)		Amount		Amortization		Balance								
Technology	1 - 20	\$	3,958	\$	(798)	\$	3,160								
Customer relationships	10		4,100		(2,734)		1,366								
Total amortizable intangible assets		\$	8,058	\$	(3,532)	\$	4,526								
Technology - not subject to amortization	Indefinite		48		—		48								
Total identifiable intangibles		\$	8,106	\$	(3,532)	\$	4,574								
· · · · · · · · · · · · · · · · · · ·				_											
				Г	ecember 31, 2022										
	Estimated		Gross	Г	ecember 31, 2022										
	Estimated Useful		Gross Carrying	Γ	December 31, 2022		Net								
				<u> </u>			Net Balance								
Technology	Useful	\$	Carrying	<u>г</u> \$	Accumulated	\$									
Technology Customer relationships	Useful Lives (Years)	\$	Carrying Amount		Accumulated Amortization	\$	Balance								
05	Useful Lives (Years) 1 - 20	\$	Carrying Amount 3,958		Accumulated Amortization (604)	\$	Balance 3,354								
Customer relationships	Useful Lives (Years) 1 - 20	\$	Carrying Amount 3,958 4,100	\$	Accumulated Amortization (604) (2,426)		Balance 3,354 1,674								

Total amortization expense, which is associated with selling, general and administrative expenses on the condensed consolidated statements of operations, was \$0.2 million for each of the three months ended September 30, 2023 and 2022 and \$0.5 million for each of the nine months ended September 30, 2023 and 2022, respectively.

Identifiable intangibles are tested for impairment whenever events or changes in circumstances indicate that their carrying amount may not be recoverable. As of September 30, 2023, we evaluated potential triggering events, including the Texas Matter discussed in "Note 9. Commitments and Contingencies" and the decline in the quoted price of our common stock. However, we determined that there were no triggering events which indicated potential impairment of our intangibles, which are substantially related to our Repeat Precision asset group. Therefore, we did not record any impairment charges related to our identifiable intangibles for the three and nine months ended September 30, 2023 and 2022.

### Note 7. Accrued Expenses

Accrued expenses consist of the following as of September 30, 2023 and December 31, 2022 (in thousands):

	September 30, 2023	December 31, 2022
Accrued payroll and bonus	\$ 2,342	\$ 3,227
Property and franchise taxes accrual	292	340
Severance and other termination benefits	473	—
Accrual for legal contingencies (See Note 9)	1,743	
Accrued other miscellaneous liabilities	215	824
Total accrued expenses	\$ 5,065	\$ 4,391

In June 2023, we implemented efforts to streamline our tracer diagnostics operations, which involved employee terminations or relocations, as well as the consolidation of certain leased facilities. Similarly, Repeat Precision consolidated its two manufacturing facilities in Mexico. In connection with these efforts, we recognized severance and moving costs totaling \$0.1 million and \$0.4 million for the three and nine months ended September 30, 2023, respectively. As of September 30, 2023, we have not recognized any lease termination costs associated with these efforts, but we may incur such costs in the future if we decide to terminate the operating leases or cannot sublet the facilities. Repeat Precision has agreed to sublet the former facility in Mexico beginning in October 2023.

In July 2023, an executive officer and NCS agreed that he would leave his position. In connection therewith and pursuant to an employment agreement, we incurred severance and other charges of \$1.0 million in July 2023. Of these charges, \$0.4 million represents the acceleration of expense recognition under stock-based compensation arrangements because these long-term incentive awards will continue to vest in accordance with the underlying agreements, but there is no further service requirement. The cash payments to the former executive of \$0.6 million commenced in July 2023 and we paid \$0.1 million for the quarter ended September 30, 2023, resulting in a remaining severance and other termination benefits accrual of \$0.5 million as of September 30, 2023. We expect this severance and other termination benefits liability to be fully paid by July 2024.

### Note 8. Debt

Our long-term debt consists of the following as of September 30, 2023 and December 31, 2022 (in thousands):

	mber 30, 2023	Dec	ember 31, 2022
ABL Facility	\$ 	\$	
Repeat Precision Promissory Note			56
Finance leases	8,298		7,870
Total debt	 8,298		7,926
Less: current portion	(1,755)		(1,489)
Long-term debt	\$ 6,543	\$	6,437

The estimated fair value of total debt as of September 30, 2023 and December 31, 2022 was \$7.0 million and \$6.8 million, respectively. The fair value of the Repeat Precision Promissory Note (as defined below) approximated the carrying value due to a variable interest rate and the ability to repay the note at any time. The fair value of the finance leases was estimated using Level 2 inputs by calculating the sum of the discounted future interest and principal payments at our incremental borrowing rate through the date of maturity.

Below is a description of our financing arrangements.

## **ABL Facility**

On May 3, 2022, we entered into a secured asset-based revolving credit facility (the "ABL Facility") under which credit availability is subject to a borrowing base calculation. The ABL Facility is governed by the Credit Agreement dated as of May 3, 2022, by and between NCS Multistage Holdings, Inc. ("NCSH"), Pioneer Investment, Inc. ("Pioneer"), NCS Multistage, LLC, NCS Multistage Inc. ("NCS Canada"), the other loan parties thereto, the lenders party thereto, and JPMorgan Chase Bank, N.A., as administrative agent and as a lender under the facility provided therein (the "Credit Agreement"). Concurrent with the entry into our Credit Agreement on May 3, 2022, our prior ABL facility was terminated as more fully described in our Annual Report.

The ABL Facility consists of a revolving credit facility in an aggregate principal amount of \$35.0 million made available to borrowers, of which up to \$10.0 million may be made in Canadian dollars and \$7.5 million may be made available for letters of credit. Total borrowings available to the borrowers under the ABL Facility may be limited subject to a borrowing base calculated on the sum of cash in a specified pledged account, eligible accounts receivables and eligible inventory, provided it does not include the assets of Repeat Precision. Our available borrowing base under the ABL Facility at September 30, 2023 was \$19.7 million. The ABL Facility will mature on May 3, 2027. As of September 30, 2023 and December 31, 2022, we had no outstanding indebtedness under the ABL Facility.

Borrowings under the ABL Facility may be made in U.S. dollars with interest calculated using either the "ABR", the "Adjusted Daily Simple SOFR" or the "Adjusted Term SOFR Rate", and in Canadian dollars with interest calculated using the "Canadian Prime Rate" or the "CDOR Rate" (each as defined in the Credit Agreement). Borrowings bear interest plus a margin that varies depending on our leverage ratio as follows: (i) for ABR based loans, between 1.40% and 2.40%, and (ii) for Adjusted Daily Simple SOFR, Adjusted Term SOFR Rate, Canadian Prime Rate, and CDOR Rate, between 2.40% and 3.40%. We must also pay a monthly commitment fee of 0.25% to 0.50% per year, based on unused commitments. The applicable interest rate at September 30, 2023 was 7.7%. We incurred interest expense related to the ABL Facility, including commitment fees, of less than \$0.1 million for each of the three months ended September 30, 2023 and 2022 and \$0.2 million and \$0.1 million for the nine months ended September 30, 2023 and 2022, respectively.

The obligations of the borrowers under the ABL Facility are guaranteed by NCSH and each of our U.S. and Canadian subsidiaries (other than Repeat Precision), as well as each of our future direct and indirect subsidiaries organized under the laws of the United States or Canada (subject to certain exceptions), and are secured by substantially all of the assets of NCSH and its subsidiaries, in each case, subject to certain exceptions and permitted liens.

The Credit Agreement requires, as a condition to borrowing, that available cash on hand after borrowings does not exceed \$10.0 million. The Credit Agreement also requires us to (i) maintain, for quarters during which liquidity is less than 20% of the aggregate revolving commitments, a fixed charge coverage ratio of at least 1.0 to 1.0 and (ii) to prepay advances to the extent that the outstanding loans and letter of credit amounts exceed the most recently calculated borrowing base. As of September 30, 2023, we were in compliance with these financial covenants. The Credit Agreement also contains customary affirmative and negative covenants, including, among other things, restrictions on the creation of liens, the incurrence of indebtedness, investments, dividends and other restricted payments, dispositions and transactions with affiliates.

The Credit Agreement includes customary events of default for facilities of this type (with customary materiality thresholds and grace periods, as applicable). If an event of default occurs, the lenders party to the Credit Agreement may elect (after the expiration of any applicable notice or grace periods) to declare all outstanding borrowings under such facility, together with accrued and unpaid interest and other amounts payable thereunder, to be immediately due and payable. The lenders party to the Credit Agreement also have the right upon an event of default thereunder to terminate any commitments to provide further borrowings, or to provide additional financing in excess of the borrowing base limit, or to proceed against the collateral securing the ABL Facility.

We capitalized direct costs of \$1.0 million in connection with the Credit Agreement, which are being amortized over the term of the ABL Facility using the straight-line method. Amortization of the deferred financing charges of \$0.1 million for each of the three months ended September 30, 2023 and 2022 and \$0.2 million and \$0.1 million for the nine months ended September 30, 2023 and 2022, respectively, was included in interest expense, net.

#### **Repeat Precision Promissory Note**

On February 16, 2018, Repeat Precision entered into a promissory note for an aggregate borrowing capacity of \$4.3 million with Security State Bank & Trust, Fredericksburg (the "Repeat Precision Promissory Note"). The Repeat Precision Promissory Note has a one year term that has been renewed several times and is scheduled to mature on August 10, 2024. The note bears interest at a variable interest rate based on prime plus 1.00%. The applicable interest rate at September 30, 2023 was 9.5%. The Repeat Precision Promissory Note is collateralized by certain equipment, inventory and receivables of Repeat Precision. Total borrowings may be limited subject to a borrowing base calculation, which includes a portion of Repeat Precision's eligible receivables, inventory and equipment. As of September 30, 2023, there was no outstanding indebtedness under the promissory note. As of December 31, 2022, Repeat Precision had \$0.1 million of outstanding indebtedness under the promissory note. Repeat Precision's indebtedness is guaranteed by Repeat Precision and is not guaranteed by any other NCS entity.

#### **Finance Leases**

We lease assets under finance lease arrangements including an office and laboratory in Tulsa, Oklahoma, as well as facilities in Odessa, Texas, and certain operating equipment and software. We also maintain a vehicle leasing arrangement with a fleet management company through which we lease light vehicles and trucks that meet the finance lease criteria.

#### Note 9. Commitments and Contingencies

#### Litigation

In the ordinary course of our business, from time to time, we have various claims, lawsuits and administrative proceedings that are pending or threatened with respect to commercial, intellectual property and employee matters.

#### **Texas Matter**

NCS was a defendant in a lawsuit in the District Court of Winkler County, Texas, for which the trial began in late April 2023 (the "Texas Matter"). The lawsuit was filed in September 2019 by plaintiffs Boyd & McWilliams Energy Group, Inc. *et. al.* claiming damage to their wells in 2018 resulting from an alleged product defect related to components provided by a third-party supplier. On May 2, 2023, the jury returned a verdict against us, and included damages figures in favor of the plaintiff for \$17.5 million and up to \$42.5 million, net of amounts owed to us. On May 15, 2023, a judgment was rendered which awarded the plaintiffs total damages of \$42.5 million, inclusive of pre-judgment interest, further subject to court costs and post-judgment interest. We believe that existing established case law supports a strong ground to appeal the judgment with regards to the proper measure of damages. We intend to appeal the judgment and believe we have strong arguments that may lead to a reversal of some or all the awarded damages. In addition, we expect a large portion, up to all, of any resultant liability to be covered by our insurance carrier. The parties in the Texas Matter, including our insurance carrier, attended a mediation meeting in late August 2023. While no agreement has yet been reached, all parties have continued with settlement negotiations. If the Texas Matter is not settled through the mediation effort, the appeals process could take more than a year and could result in a new trial or further appeals, which may not conclude for several years thereafter.

As of September 30, 2023, we have accrued a provision for litigation of \$40.8 million associated with the Texas Matter. This represents the total judgment rendered plus court costs, net of \$2.0 million previously paid by our insurance carrier to the plaintiff. The judgment in the Texas Matter also included an award of post-judgment interest, to be calculated at 8%, compounded annually, until payment of the final judgment. This post-judgment interest totals approximately \$1.2 million for the period May 16, 2023 through September 30, 2023. However, in light of mediation discussions, NCS's intent to appeal the matter if not settled at a mutually-agreed amount that aligns with a more appropriate measure of damages, and the expectation that a large portion, up to all post-judgment interest will be covered by our insurance provider, we do not believe the payment of this post-judgment interest is probable, and therefore, have not accrued this amount as of September 30, 2023. If we successfully appeal or settle the Texas Matter for an amount less than the total judgment, we will reduce our accrual for legal contingencies and reverse such portion of the provision for litigation expense during the applicable period. Conversely, we could increase the accrual for legal contingencies and corresponding provision for liabilities if we determined that the payment of post-judgment interest is probable or if there are additional court fees associated with the Texas Matter.

Further, except as noted above for the amounts previously paid by our insurance carrier in the Texas Matter, we have not recognized expected but unpaid insurance recoveries as an asset or an offsetting benefit to the provision for legal contingencies as of September 30, 2023. Any such insurance proceeds will reduce our accrual for legal contingencies and reverse such portion of the provision for litigation expense in the period received or when determined to be realizable.

### Wyoming Matter

NCS was the defendant in a lawsuit in a state district court in Wyoming, which settled in August 2023 (the "Wyoming Matter"). The claim related to an alleged service issue by our personnel during completion operations. The parties agreed to a settlement that included a payment to the plaintiff of \$2.0 million, which was paid on NCS's behalf under a policy of insurance and NCS received \$0.6 million as reimbursement of unpaid invoices from the plaintiff. During the three months ended September 30, 2023, we reversed our previous accrual for this legal contingency of \$1.7 million, and we recorded the benefit from payment of the aged invoices as other income in the accompanying condensed consolidated statement of operations.

## **Canada Patent Matters**

On July 24, 2018, we filed a patent infringement lawsuit seeking unspecified damages against Kobold Corporation, Kobold Completions Inc. and 2039974 Alberta Ltd. ("Kobold") in the Federal Court of Canada ("Canada Court"), alleging that Kobold's fracturing tools and methods infringe on several of our Canadian patents. On July 12, 2019, Kobold filed a counterclaim seeking unspecified damages alleging that our fracturing tools and methods infringe on their patent. The patent infringement litigation against Kobold and their counterclaim was heard in early 2022.

On October 10, 2023, the judge rendered a decision against us holding that our asserted patents are invalid and that we are infringing the Kobold asserted patent. The Canada Court ordered us to pay Kobold approximately \$1.7 million (\$2.4 million in Canadian dollars) in costs and disbursements, as well as taxes payable thereon, and granted an injunction prohibiting us from any further infringement of their patent. This amount is included in provision for litigation in the accompanying condensed consolidated statement of operations and in our accrued expenses in the accompanying condensed unaudited balance sheet. See "Note 7. Accrued Expenses".

We believe that applicable law supports strong grounds to appeal the decision by the Canada Court as well as to reduce the costs award significantly. We intend to appeal the judgment and believe we have strong arguments that may lead to a reversal of substantial portions of the decision. In addition, we do not know what damages, if any, the Canada Court will award to Kobold as the damages portion was bifurcated and will likely be heard by the Canada Court only after we complete our appeal of the liability phase. We expect the appeal to be heard in late 2024, and a decision granted in early to mid-2025. If we do not prevail in the appeal phase, we would expect any damages awarded to be more modest because of the relative ease and minimal cost in implementing changes to our product to comply with the injunction, with such changes having resulted to date in insignificant commercial impact.

On April 6, 2020, Kobold filed a separate patent infringement lawsuit seeking unspecified damages against us in Canadian Court, alleging that our fracturing tools infringe on their Canadian patents. In the summary judgment phase, we have successfully dismissed some of the asserted products. However, we were not able to dismiss all of the claims because there remained factual determinations that were not possible in a summary judgment proceeding for our other products. We believe we have strong arguments of invalidity and non-infringement in this matter. This patent infringement litigation has not yet been assigned a trial date.

#### **Other Patent Matters**

In connection with our patent infringement jury verdict against Nine Energy Services, Inc. ("Nine"), the Western District of Texas, Waco Division ("Waco District Court") entered final judgment in June 2022 and awarded NCS approximately \$0.5 million in damages for Nine's infringement of U.S. Patent No. 10,465,445 ("the '445 Patent"). At a hearing in December 2022, the Waco District Court announced it would be awarding hundreds of thousands of dollars in supplemental damages, interest, and costs and ordered Nine to pay an ongoing royalty for the sale of infringing casing flotation devices for the life of the '445 Patent. In addition, in August 2022 in connection with our patent infringement jury verdict against TCO AS, the jury awarded NCS approximately \$1.9 million in damages for TCO AS's infringement of the '445 Patent. The Waco District Court has entered the final judgment in that case, and we are seeking an award of ongoing royalties for TCO AS's continued post-judgment infringement, supplemental damages, interest, and cost. Both cases remain subject to appeal. Therefore, we have not recorded any potential gain contingencies associated with these matters in the accompanying condensed consolidated statements of operations.

In accordance with GAAP, we accrue for contingencies where the occurrence of a material loss is probable and can be reasonably estimated. Our legal contingencies may increase or decrease, on a matter-by-matter basis, to account for future developments. Although the outcome of any legal proceeding cannot be predicted with any certainty, our assessment of the likely outcome of litigation matters is based on our judgment of a number of factors, including experience with similar matters, past history, precedents, relevant financial information and other evidence and facts specific to each matter.

### **Operating Leases**

In April 2023, we relocated to a new facility in Red Deer, Alberta, Canada, for which we recorded an operating lease right of use asset and leasehold improvement and corresponding liability of \$1.7 million. This operating lease has a term of approximately five years.

#### Note 10. Share-Based Compensation

During the nine months ended September 30, 2023, we granted 81,021 equity-classified restricted stock units ("RSUs") with a weighted average grant date fair value of \$24.49. We account for RSUs granted to employees at fair value, which we measure as the closing price of our common stock on the date of grant, and we recognize the compensation expense in the financial statements over the requisite service period. The RSUs granted to our employees generally vest over a period of three equal annual installments beginning on or around the anniversary of the date of grant. The RSUs granted to the members of our Board of Directors generally vest on the one year anniversary of the grant date and either settle at vesting or, if the director has elected to defer the RSUs, within thirty days following the earlier of the termination of the director's service for any reason or a change of control.

During the nine months ended September 30, 2023, we granted 90,041 equivalent stock units, or cash-settled, liability-classified RSUs ("ESUs"), with a weighted average grant date fair value of \$24.49. When the ESUs are originally granted to employees, they are valued at fair value, which we measure as the closing price of our common stock on the date of grant. Since the ESUs will be settled in cash, we record a liability, which is remeasured each reporting period at fair value based upon the closing price of our common stock until the awards are settled. The ESUs generally vest and settle over a period of three equal annual installments beginning on or around the anniversary of the date of grant. The cash settled for any ESU will not exceed the maximum payout established by our Compensation, Nominating and Governance Committee of the Board of Directors.

In addition, during the nine months ended September 30, 2023, we granted 13,681 performance stock unit awards ("PSUs"), which have a performance period from January 1, 2023 to December 31, 2025. The PSUs grant date fair value of \$36.02 was measured using a Monte Carlo simulation. The number of PSUs ultimately issued under the program is dependent upon our total shareholder return relative to a performance peer group ("relative TSR") over the three year performance period. Each PSU associated with the March 2023 award will settle for between zero and two shares of our common stock in the first quarter of 2026. The threshold performance level (25th percentile relative TSR) starts to earn PSUs, the mid-point performance level (50th percentile relative TSR) or greater earns 200% of the target PSUs.

Total share-based compensation expense for all awards was \$1.7 million and \$1.0 million for the three months ended September 30, 2023 and 2022, respectively, and \$4.2 million and \$4.5 million for the nine months ended September 30, 2023 and 2022, respectively.

## Note 11. Income Taxes

The computation of the annual estimated effective tax rate at each interim period requires certain estimates and assumptions including, but not limited to, the expected operating income (or loss) for the year, projections of the proportion of income (or loss) earned and taxed in foreign jurisdictions, permanent and temporary differences and the likelihood of recovering deferred tax assets generated in the current year. The accounting estimates used to compute the provision for income taxes may change as new events occur, more experience is acquired or additional information is obtained. The computation of the annual estimated effective tax rate includes applicable modifications, which were projected for the year, such as certain book expenses not deductible for tax, tax credits and foreign deemed dividends.

Our effective tax rate ("ETR") from continuing operations was (15.0)% and (3.1)% for the three months ended September 30, 2023 and 2022, respectively, and 0.7% and 16.1% for the nine months ended September 30, 2023 and 2022, respectively. During these periods, our ETR differed from the statutory federal income tax rate primarily due to the tax effects of changes in valuation allowance on deferred tax assets not expected to be realized and the tax expense recorded related to stock awards and foreign taxes.

## Note 12. Earnings (Loss) Per Common Share

The following table presents the reconciliation of the numerator and denominator for calculating earnings (loss) per common share from net income (loss) (in thousands, except per share data):

	Three Months Ended September 30,					Nine Mon Septen												
	2023		2023		2023		2023		2023		2023		2022		2023			2022
Numerator																		
Net income (loss)	\$	4,112	\$	3,964	\$	(42,960)	\$	(3,243)										
Less: (loss) income attributable to non-controlling interest		(296)		29		(168)		(162)										
Net income (loss) attributable to NCS Multistage Holdings, Inc.	\$	4,408	\$	3,935	\$	(42,792)	\$	(3,081)										
Denominator																		
Basic weighted average number of shares		2,479		2,438		2,469		2,430										
Dilutive effect of stock options, RSUs and PSUs		10		50														
Diluted weighted average number of shares		2,489		2,488		2,469		2,430										
Earnings (loss) per common share																		
Basic	\$	1.78	\$	1.61	\$	(17.33)	<u>\$</u>	(1.27)										
Diluted	\$	1.77	\$	1.58	\$	(17.33)	\$	(1.27)										
Potentially dilutive securities excluded as anti-dilutive		114		210		147		275										

## Note 13. Segment and Geographic Information

We have determined that we operate in one reportable segment that has been identified based on how our chief operating decision maker manages our business. See "Note 2. Revenues" for our disaggregated revenue by geographic area.

## Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis of our financial condition and results of operations should be read together with our financial statements and the related notes thereto included in this Quarterly Report on Form 10-Q ("Quarterly Report") and with our audited financial statements and the related notes thereto included in our Annual Report on Form 10-K ("Annual Report"), filed with the Securities and Exchange Commission (the "SEC"). This discussion and analysis contains forward-looking statements regarding the industry outlook, estimates and assumptions concerning events and financial and industry trends that may affect our future results of operations or financial condition and other non-historical statements. These forward-looking statements are subject to numerous risks and uncertainties, including but not limited to the risks and uncertainties described in "—Cautionary Note Regarding Forward-Looking Statements" and "Risk Factors." Our actual results may differ materially from those contained in or implied by these forward-looking statements. As used in this Quarterly Report, except where the context otherwise requires or where otherwise indicated, the terms "Company," "NCS," "we," "our" and "us" refer to NCS Multistage Holdings, Inc.

## **Overview and Outlook**

We are a leading provider of highly engineered products and support services that facilitate the optimization of oil and natural gas well construction, well completions and field development strategies. We provide our products and services primarily to exploration and production ("E&P") companies for use in onshore and offshore wells, predominantly wells that have been drilled with horizontal laterals in both unconventional and conventional oil and natural gas formations. Our products and services are utilized in oil and natural gas basins throughout North America and in selected international markets, including Argentina, China, the Middle East and the North Sea. We provide our products and services to various customers, including leading large independent oil and natural gas companies and major oil companies.

Our primary offering is our fracturing systems products and services, which enable efficient pinpoint stimulation: the process of individually stimulating each entry point into a formation targeted by an oil or natural gas well. Our fracturing systems products and services can be used in both cemented and open-hole wellbores and enable our customers to precisely place stimulation treatments in a more controlled and repeatable manner as compared with traditional completion techniques. Our fracturing systems products and services are utilized in conjunction with third-party providers of pressure pumping, coiled tubing and other services. As an extension of fracturing systems, we offer enhanced recovery systems, which enable our customers to inject water, other fluids, or gases in a controlled manner with the objective of increasing the number of hydrocarbons produced from their assets.

We own a 50% interest in Repeat Precision, LLC ("Repeat Precision"), which sells composite frac plugs, perforating guns and related products. We provide tracer diagnostics services for well completion and reservoir characterization that utilize downhole chemical and radioactive tracers. We sell products for well construction, including casing buoyancy systems, liner hanger systems and toe initiation sleeves. We operate in one reportable segment that has been identified based on how our chief operating decision maker manages our business.

Our products and services are primarily sold to North American E&P companies and our ability to generate revenues from our products and services depends upon oil and natural gas drilling and completion activity in North America. Oil and natural gas drilling and completion activity is directly influenced by oil and natural gas prices.

Based on E&P company activity to date and expected capital budgets for the remainder of 2023, and updated industry reports, we believe that annual average drilling and completion industry activity in Canada will be flat compared to the prior year level, which is lower than our original estimate in prior quarters as the industry activity has been slower than anticipated, and the activity in the United States will decline on average by 5% - 10% over that period. We continue to expect international industry activity to improve by over 10% in 2023 as compared to the prior year.

Oil and natural gas prices were volatile in 2022, and this volatility has continued into 2023. The ongoing war between Russia and Ukraine has played a significant role in this volatility, as the invasion by Russia in February 2022 led to increased prices. The impact of the war on pricing was somewhat mitigated by heightened uncertainty in demand and growing concerns about a global recession. Certain countries have agreed and extended voluntary crude oil output cuts to mitigate the impact of uncertain economic conditions on the oil market. See further discussion below on these voluntary output cuts. In addition, Hamas attacked Israel in October 2023 and the resulting Israeli-Hamas conflict could add to commodity price volatility if the war continues and escalates.

We continue to face intense competitive pressure across all of our product and services offerings, which has and may continue to have a negative impact on market share and operating margins for certain product lines. Furthermore, this competitive pressure constrains our ability to raise prices in an inflationary environment. The competitive pressure for our fracturing system product line may increase as a result of the recent court decision which held certain of our Canadian patents to be invalid. The court also issued an injunction, for which, to comply, we have made minor product modifications. These modifications have had minimal, if any, cost or commercial impact on us, and we do not anticipate significant commercial impact, as a result thereof in the future. For further

discussion of this matter, please see "Note 9. Commitments and Contingencies" to the accompanying unaudited condensed consolidated financial statements for further discussion.

Since late 2021, we have experienced modest disruptions to our supply chain, and higher prices for certain raw materials, including steel and chemicals, and purchased components and outsourced services. This cost inflation persisted throughout 2022 and has continued into 2023, though prices for steel have begun to moderate. Consequently, we qualified additional suppliers to fulfill our requirements for materials, components, and services to mitigate the risk of negative supply disruptions or prolonged delivery times. While we have increased customer prices because of our higher raw material and component costs, these price increases have not always fully offset our higher input costs and there has been a delay in our ability to do so. We also have experienced tight labor conditions which has led to increased employee turnover, delays in filling open positions and labor cost inflation, which have impacted both our cost of sales and selling, general and administrative ("SG&A") expenses. This labor cost inflation increased throughout 2022 and continues into 2023, and has resulted in higher salaries, hourly pay rates and benefit costs.

To counter inflationary pressures on the economy, central banks, including the U.S. Federal Reserve, have increased reference interest rates, an action which typically has the effect of increasing borrowing costs and restraining economic activity. While there has been a recent pause on further rate increases, the U.S. Federal Reserve could raise the referenced interest rates in the near term, which may add further stress on banking systems. There have been several noted regional bank failures in the United States during 2023. Although we have no direct exposure to these banks, there is a possibility that any resulting instability of the banking system could reduce the rate of global economic growth and might lead to a recessionary environment in certain economies, including Europe and the United States. Any decline in economic activity resulting from such actions could moderate or lower demand for oil and natural gas.

## **Market Conditions**

### Oil and Natural Gas Drilling and Completion Activity

Oil and natural gas prices remain volatile, with WTI crude oil pricing decreasing in the first half of 2023 but then rising to an average WTI price of \$82/BBL during the third quarter of 2023, compared to an average price of approximately \$83/BBL during the fourth quarter of 2022. This increase in the third quarter of 2023 reflects the extension of crude oil production cuts of 1.3 MMBBL/D primarily by Saudi Arabia in addition to tightening oil markets and lower global inventories partially offset by a softer macroeconomic environment, which may lower demand. In 2022, to address the uncertain outlook in the global economic and oil markets, members of OPEC and certain other countries, including Russia (informally known as "OPEC+") agreed to a collective voluntary oil production reduction of 2 MMBBL/D beginning in November 2022 through December 2023. During 2023, OPEC+ announced further output cuts through December 2023 as well as additional output cuts beginning in January 2024 through December 2024 that will limit production to a combined total of 40.5 MMBBL/D. In addition to the OPEC+ productions cuts, other countries, primarily Saudi Arabia, announced further reductions beginning in July 2023 through December 2023.

Natural gas pricing also continues to be volatile and has decreased in 2023 to an average of \$2.59 per MMBtu during the third quarter of 2023 compared to an average of \$5.55 per MMBtu during the fourth quarter of 2022. Realized natural gas prices for Canadian E&P customers are typically at a discount to U.S. Henry Hub pricing. In the second and third quarters of 2022, natural gas pricing in the United States was supported by increased demand for exports of liquified natural gas ("LNG"), especially for power generation in Europe and Asia, reflecting European demand for LNG sourced from the United States and other regions to offset supply historically provided by Russia. However, natural gas pricing has declined in 2023 due to the recent overall warm winter weather conditions and extended downtime at an LNG export facility, which has decreased near-term demand and led to robust levels of natural gas in storage, which has negatively impacted drilling and completion activity in certain regions, particularly in the United States.

Sustained meaningful declines in commodity prices, or sustained periods when the local pricing received in regional markets is below benchmark pricing, known in the industry as high differentials, would be expected to lead North American E&P companies to reduce drilling and completion activity, which could negatively impact our business.

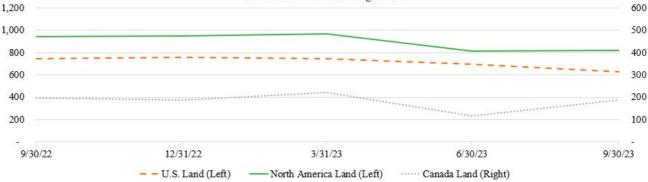

Listed and depicted below are recent crude oil and natural gas pricing trends, as provided by the Energy Information Administration ("EIA") of the U.S. Department of Energy:

-Henry Hub Natural Gas (per MMBtu)

Listed and depicted below are the average number of operating onshore rigs in the United States and in Canada per quarter since the third quarter of 2022, as provided by Baker Hughes Company. The quarterly changes, particularly for the second quarter Canadian land rig count, can be partially attributed to seasonality of activity in that market:

	Average Drilling Rig Count							
Quarter Ended	U.S. Land	Canada Land	North America Land					
9/30/2022	744	198	942					
12/31/2022	760	187	947					
3/31/2023	744	221	965					
6/30/2023	699	116	815					
9/30/2023	630	187	817					

Over the past several years, North American E&P companies have been able to reduce their cost structures and have also utilized technologies, including ours, to increase efficiency and improve well performance. The average U.S. land rig count and completion activity continued to increase from lows reached in late 2020 until the fourth quarter of 2022. However, the average U.S. land rig count has declined by 17%, to 630, in the third quarter of 2023 as compared to the fourth quarter of 2022, and has also declined by 15% compared to the same period in 2022. The average land rig count in Canada for the third quarter of 2023 was lower by 6% compared to the same period in 2022. We currently expect U.S. rig counts and completion activity in 2023 to decline from the prior year levels while the Canadian activity will remain flat.

A substantial portion of our business is subject to seasonality which results in quarterly variability. In Canada, we typically experience higher activity levels in the first quarter of each year, as our customers take advantage of the winter freeze to gain access to remote drilling and production areas. In the past, our revenue in Canada has declined during the second quarter due to warming weather conditions that result in thawing, softer ground, difficulty accessing well sites and road bans that curtail drilling and completion activity. Access to well sites typically improves throughout the third and fourth quarters in Canada, leading to activity levels that are higher than in the second quarter, but usually lower than activity in the first quarter. During the second quarter of 2023, access to well sites was further impacted by Canadian wildfires, a seasonal phenomenon, but more extensive in 2023 relative to prior years. These wildfires resulted in selected shut-ins of oil and natural gas production, which has negatively impacted certain of our customers cash flows, which has impacted drilling and completion activity in the third quarter of 2023 as compared to initial budgeted activity. Our business can be impacted by a reduction in customer activity during the winter holidays in late December and early January. In recent years, many customers in the United States and Canada exhausted their capital budgets prior to the end of the year, which can lead to reductions in drilling and completion activity during the fourth quarter.

#### How We Generate Revenues

We derive our revenues from the sale of our fracturing systems and enhanced recovery systems products and the provision of related services, the sale of composite frac plugs, perforating guns and related products through Repeat Precision and from sales of our tracer diagnostics services, casing buoyancy systems, liner hanger systems and toe initiation sleeves products.

Product sales represented 71% and 70% of our revenues for the three months ended September 30, 2023 and 2022, respectively, and 69% for the nine months ended September 30, 2023 and 2022, respectively. Most of our sales are on a just-in-time basis, as specified in individual purchase orders, with a fixed price for our products. We occasionally supply our customers with large orders that may be filled on negotiated terms. Services represented 29% and 30% of our revenues for the three months ended September 30, 2023 and 2022, respectively, and 21% for the nine months ended September 30, 2023 and 2022, respectively. Services include our tool charges and associated services related to our fracturing systems and tracer diagnostics services. Services are provided at agreed upon rates to customers for the provision of our downhole frac isolation assembly, our personnel and for the provision of tracer diagnostics services.

During periods of low drilling and well completion activity or as may be needed to compete in certain markets, we may, in some instances, lower the prices of our products and services. Our revenues are also impacted by well complexity, since wells with more stages typically result in longer jobs which may increase revenue attributable to the use of more sliding sleeves or increase composite frac plug sales, and increase the volume of services we provide.

The percentages of our revenues derived from sales in Canada and denominated in Canadian dollars were approximately 74% and 71% for the three months ended September 30, 2023 and 2022, respectively, and approximately 68% and 66% for the nine months ended September 30, 2023 and 2022, respectively. Our Canadian contracts are typically invoiced in Canadian dollars; therefore, the effects of foreign currency fluctuations impact our revenues and are regularly monitored. A further strengthening of the U.S. dollar,

#### **Table of Contents**

our reporting currency, relative to the Canadian dollar would result in lower reported revenues, partially offset by lower reported cost of sales and SG&A expenses.

Although most of our sales are to North American E&P companies, we also have sales to customers outside of North America, and we expect sales to international customers to increase over time. These international sales are made through local NCS entities or to our local operating partners typically on a free on board or free carrier basis with a point of sale in the United States. Some of the locations in which we have operating partners or sales representatives include China and the Middle East. Our operating partners and representatives do not have authority to contractually bind NCS but market our products in their respective territories as part of their product or services offering.

### **Costs of Conducting our Business**

Our cost of sales is comprised of expenses relating to the manufacture of our products in addition to the costs of our support services. Manufacturing cost of sales includes payments made to our suppliers for raw materials and payments made to machine shops for the manufacture of product components and finished assemblies and costs related to our employees that perform quality control analysis, assemble and test our products. In addition, Repeat Precision operates manufacturing facilities with supporting personnel in Mexico, which has allowed us to reduce our costs for certain product categories. We review forecasted activity levels in our business and either directly procure or support our vendors in procuring the required raw materials with sufficient lead time to meet our business requirements. We obtain certain chemicals utilized in our tracer diagnostics services business from suppliers in China, which are subject to tariffs that increase our cost of parts and components, although these tariffs have recently declined. Prices for certain raw materials, including steel and chemicals and for purchased components and outsourced services, have increased in recent years due to inflation, exacerbated by the impacts resulting from Russia's continuing invasion of Ukraine, though prices for steel have begun to moderate. Cost of sales for support services includes compensation and benefit-related expenses for employees who provide direct revenue generating services to customers in addition to the costs incurred by these employees for travel and subsistence while on site. Cost of sales includes other variable manufacturing costs, such as shrinkage, obsolescence, revaluation and scrap related to our existing inventory and costs related to the chemicals used and laboratory analysis associated with our tracer diagnostics services.

Our SG&A expenses are comprised of compensation expense, which includes compensation and benefit-related expenses for our employees who are not directly involved in revenue generating activities, including those involved in our research and development activities, as well as our general operating costs. These general operating costs include, but are not limited to: rent and occupancy for our facilities, information technology infrastructure services, software licensing, advertising and marketing, third party research and development, risk insurance and professional service fees for audit, legal and other consulting services. Our SG&A expenses also include litigation expenses, severance expenses and expected credit losses.

The percentage of our operating costs denominated in Canadian dollars (including cost of sales and SG&A expenses but excluding depreciation and amortization expense) approximated 31% and 39% for the three months ended September 30, 2023 and 2022, respectively, and approximated 30% and 26% for the nine months ended September 30, 2023 and 2022, respectively.

## **Results of Operations**

## Three Months Ended September 30, 2023 Compared to Three Months Ended September 30, 2022

The following table summarizes our revenues and expenses for the periods presented (dollars in thousands):

	Three Moi Septem				Variance	e
	 2023	2022			\$	% (1)
Revenues						
Product sales	\$ 27,286	\$	33,965	\$	(6,679)	(19.7)%
Services	 10,993		14,905		(3,912)	(26.2)%
Total revenues	38,279		48,870		(10,591)	(21.7)%
Cost of sales						
Cost of product sales, exclusive of depreciation						
and amortization expense shown below	17,118		20,754		(3,636)	(17.5)%

(1) NM – Percentage not meaningful

#### Revenues

Revenues were \$38.3 million for the three months ended September 30, 2023 as compared to \$48.9 million for the three months ended September 30, 2022. This decrease reflects lower Canadian and U.S. product sales and services revenues and lower international services revenues, partially offset by an increase in international product sales. These results were impacted by lower activity levels in 2023 compared to the prior period. The average rig counts in Canada and the United States decreased in the third quarter of 2023 by 6% and 15%, respectively, compared to the same period in 2022. Sales of our products in the United States continue to be affected by lower natural gas prices, which had a negative impact on customer activity levels, and sales in Canada were primarily impacted by the commodity price volatility and continuing effect of the Canadian wildfires in 2023. The decreases in revenue were partially offset by favorable pricing for some of our offerings. Overall, product sales for the three months ended September 30, 2023 were \$27.3 million as compared to \$34.0 million for the three months ended September 30, 2022. Services revenues totaled \$11.0 million as compared to \$14.9 million for the same periods.

## Cost of sales

Cost of sales was \$22.6 million, or 59.0% of revenues, for the three months ended September 30, 2023 as compared to \$28.4 million, or 58.1% of revenues, for the three months ended September 30, 2022. The increase in the cost of sales as a percentage of revenues was primarily due to lower product sales volumes, impacted by a general decrease in activity level in the industry, as well as ongoing inflationary pressures, leading to increased operating costs. The increase was partially offset by improved pricing for our products and services. For the three months ended September 30, 2023, cost of product sales was \$17.1 million, or 62.7% of product sales revenue, and cost of services was \$5.4 million, or 49.6% of services revenue. For the three months ended September 30, 2022,

cost of product sales was \$20.8 million, or 61.1% of product sales revenue, and cost of services was \$7.6 million, or 51.3% of services revenue.

### Selling, general and administrative expenses

Selling, general and administrative expenses were \$12.7 million for the three months ended September 30, 2023 as compared to \$15.4 million for the three months ended September 30, 2022. This decrease in expense reflects a decline in relative annual incentive bonus accruals year-over-year of \$2.3 million and lower professional fees of \$1.8 million. These decreases were partially offset by an increase in severance charges of \$0.6 million primarily associated with the departure of a former executive, which also contributed to an increase in share-based compensation of \$0.7 million as discussed in "Note 7. Accrued Expenses" in the accompanying unaudited consolidated financial statements.

#### Provision for litigation, net of recoveries

During the three months ended September 30, 2023, the Wyoming Matter was settled, whereby the plaintiff received \$2.0 million, which was paid on NCS's behalf under a policy of insurance, and the plaintiff agreed to reimburse NCS for unpaid invoices totaling \$0.6 million, which was included in other income, net in the accompanying statement of operations. Consequently, we reversed the accrual for legal contingencies associated with this matter which totaled \$1.7 million. In addition, in October 2023 the Canada Court ordered us to pay \$1.7 million (\$2.4 million in Canadian dollars) of legal fees associated with a patent infringement case, which we accrued during the three months ended September 30, 2023. See "Note 9. Commitments and Contingencies" to the accompanying unaudited condensed consolidated financial statements for further discussion.

#### Other income, net

Other income, net was \$2.0 million for the three months ended September 30, 2023 as compared to \$0.6 million for the three months ended September 30, 2022. This change was largely due to the recovery of unpaid invoices through settlement of the Wyoming Matter, as discussed above, as well as an increase in royalty income and scrap sales, and \$0.1 million was associated with a technical services and assistance agreement.

#### Foreign currency exchange loss, net

Foreign currency exchange loss, net was \$0.2 million for the three months ended September 30, 2023 as compared to \$0.6 million for the three months ended September 30, 2022. The change was due to the movement in the foreign currency exchange rates between the periods, primarily the Canadian dollar relative to the U.S. dollar.

#### Income tax benefit

Income tax benefit was \$0.5 million for the three months ended September 30, 2023 as compared to \$0.1 million for the three months ended September 30, 2022. Included in the amount for the three months ended September 30, 2023 was a tax benefit of \$0.9 million related to a change in the valuation allowance on deferred tax assets not expected to be realized and a tax benefit of \$0.1 million related to foreign taxes. Included in the amount for the three months ended to a decrease in the valuation allowance on deferred tax assets not expected to foreign taxes.

## Nine Months Ended September 30, 2023 Compared to Nine Months Ended September 30, 2022

The following table summarizes our revenues and expenses for the periods presented (dollars in thousands):

		ths Ended ber 30,		Varia	nce
	 2023	2022		 \$	% (1)
Revenues	 				
Product sales	\$ 76,149	\$	79,549	\$ (3,400)	(4.3)%
Services	31,075		35,897	(4,822)	(13.4)%

#### Revenues

Revenues were \$107.2 million for the nine months ended September 30, 2023 as compared to \$115.4 million for the nine months ended September 30, 2022. This decrease reflected lower U.S., and to a lesser extent Canadian, product sales as well as a decrease in Canadian and international services activity, partially offset by increases in U.S. services activity and international product sales. The overall decrease in revenues largely resulted from declining industry drilling and completion activity throughout the first nine months of 2023 as compared to 2022, particularly in the United States, for which lower natural gas pricing was a contributing factor. Canadian sales during 2023 were tempered by the effect of the Canadian wildfires which primarily impacted the second quarter of 2023, but contributed to some operators delaying or forgoing projects. The decreased revenue was partially offset by favorable pricing for some of our products. Product sales for the nine months ended September 30, 2023 were \$76.1 million as compared to \$79.5 million for the nine months ended \$31.1 million as compared to \$35.9 million for the same periods.

#### Cost of sales

Cost of sales was \$64.5 million, or 60.2% of revenues, for the nine months ended September 30, 2023 as compared to \$71.1 million, or 61.6% of revenues, for the nine months ended September 30, 2022. The decrease in the cost of sales as a percentage of revenues was due to favorable pricing for some of our products and services, as well as improved utilization of manufacturing capacity and field service personnel. However, this improvement was partially offset by ongoing inflationary pressures, leading to increased operating costs, and certain expenses associated with consolidations undertaken in June 2023 of our tracer diagnostics business and Repeat Precision's manufacturing operations in Mexico, as discussed in "Note 7. Accrued Expenses" in the accompanying unaudited consolidated financial statements. Cost of product sales was \$47.9 million, or 63.0% of product sales revenue, and cost of services was \$16.6 million, or 53.3% of services revenue, for the nine months ended September 30, 2023. For the

nine months ended September 30, 2022, cost of product sales was \$51.9 million, or 65.3% of product sales revenue, and cost of services was \$19.2 million, or 53.5% of services revenue.

#### Selling, general and administrative expenses

Selling, general and administrative expenses were \$43.3 million for the nine months ended September 30, 2023 as compared to \$45.1 million for the nine months ended September 30, 2022. This decrease in expense reflects lower professional fees of \$3.5 million and a decrease in the annual incentive bonus accrual of \$1.3 million as compared to the prior year. The lower expense was partially offset by higher compensation and benefit costs of \$1.6 million primarily associated with salary increases implemented during the first quarter of 2023 and increased headcount. In addition, we recorded severance costs of \$0.8 million associated with our tracer diagnostics business consolidation efforts and the departure of a former executive officer as discussed in "Note 7. Accrued Expenses" in the accompanying unaudited consolidated financial statements.

#### Provision for litigation, net of recoveries

The provision for litigation, net of recoveries totaled \$42.5 million for the nine months ended September 30, 2023, which represents a provision related to the judgment of \$40.8 million rendered in May 2023 in the Texas Matter. In addition, in October 2023 the Canada Court ordered us to pay \$1.7 million (\$2.4 million in Canadian dollars) of legal fees associated with a patent infringement case. See Note 9, "Commitments and Contingencies" to the accompanying unaudited condensed consolidated financial statements for further discussion.

#### Other income, net

Other income, net was \$3.8 million for the nine months ended September 30, 2023 as compared to \$1.6 million for the nine months ended September 30, 2022. This change reflects the recovery of \$0.6 million of unpaid invoices associated with the Wyoming Matter, as discussed above, as well as an increase in royalty income and scrap sales, and \$0.5 million was associated with a technical services and assistance agreement.

#### Foreign currency exchange loss, net

Foreign currency exchange loss, net was \$0.1 million for the nine months ended September 30, 2023 as compared to \$0.6 million for the nine months ended September 30, 2022. The change was due to the movement in the foreign currency exchange rates between the periods, primarily the Canadian dollar relative to the U.S. dollar.

### Income tax benefit

Income tax benefit was \$0.3 million for the nine months ended September 30, 2023 as compared to \$0.6 million for the nine months ended September 30, 2022. Included in the amount for the nine months ended September 30, 2023 was a tax expense of \$8.7 million related to an increase in the valuation allowance on deferred tax assets not expected to be realized, tax expense of \$0.3 million related to stock awards, and a tax benefit of \$0.6 million related to a decrease in the valuation allowance on deferred tax assets not expected to be realized, tax expense of \$0.7 million related to stock awards, and a tax benefit of \$0.3 million related to a decrease in the valuation allowance on deferred tax assets not expected to be realized, tax expense of \$0.7 million related to stock awards, and a tax benefit of \$0.3 million related to foreign taxes.

#### Liquidity and Capital Resources

Our primary sources of liquidity are our existing cash and cash equivalents, cash flows from operations and potential borrowings under our ABL Facility and the Repeat Precision Promissory Note (as defined below). As of September 30, 2023, we had cash and cash equivalents of \$11.4 million, and total outstanding indebtedness of \$8.3 million related to finance lease obligations. Our secured asset-based revolving credit facility (the "ABL Facility") consists of an asset-based revolving credit facility in an aggregate principal amount of \$35.0 million. Total borrowings are limited to a borrowing base calculated on the sum of cash in a specified pledged account, eligible accounts receivable and eligible inventory, provided it does not include credit for the assets of Repeat Precision. At September 30, 2023, our borrowing base under the ABL Facility was \$19.7 million, with no outstanding borrowings. The amount available to be drawn under the ABL Facility may decline from current levels due to reductions in our borrowing base or a springing financial covenant if our business were to be adversely impacted by a decline in market conditions.

In addition, Repeat Precision's promissory note with Security State Bank & Trust, Fredericksburg (the "Repeat Precision Promissory Note") has total aggregate borrowing capacity of \$4.3 million. As of September 30, 2023, Repeat Precision had no outstanding indebtedness under the promissory note.

We believe that our cash on hand, cash flows from operations and potential borrowings under our ABL Facility and the Repeat Precision Promissory Note will be sufficient to fund our capital expenditure and liquidity requirements for the next twelve months and after. Our principal liquidity needs have been, and are expected to continue to be, capital expenditures, working capital, debt service and potential mergers and acquisitions.

As further described at "Note 9. Commitments and Contingencies," we recorded a loss of \$42.5 million during the nine months ended September 30, 2023, primarily associated with the Texas Matter. We intend to appeal the judgment on the Texas Matter and believe we have strong arguments that may lead to a reversal of some or all of the awarded damages. The parties, including our insurance carrier, also attended an initial mediation meeting in late August 2023. While no agreement has yet been reached, all parties have continued with settlement negotiations. Additionally, while we expect a large portion, up to all, of any resultant liability to be covered by our insurance carrier, we have not recognized the expected insurance recoveries, other than amounts previously paid by our insurance carrier to the plaintiff, as an asset or an offsetting benefit to the provision for legal contingencies as of September 30, 2023. While the outcome of our Texas Matter cannot be predicted with any certainty, based on a consideration of relevant facts and circumstances, our management currently does not expect that the results of this Texas Matter, considering our intent to appeal the judgment and our expected insurance recoveries, will have a material adverse effect on our liquidity.

We do not believe this loss contingency constitutes an event of default, as defined under the Credit Agreement, and therefore we remain in compliance with our financial covenants as of September 30, 2023. We believe our insurance coverage, supplemented with our cash on hand and current borrowing capacity would provide sufficient funding to settle any resulting outstanding obligations, and to provide adequate funding for the ensuing twelve-month period. However, if our insurance provider were to deny coverage or no longer fund the ongoing litigation, including legal fees or the bond for the appeals process, we may need to use our cash on hand and availability under our revolving line of credit to do so. While this result is currently unexpected, if we had to pay, this would significantly limit the amount of cash on hand and availability under our ABL Facility to support our ongoing liquidity requirements and could result in an event of default or require additional and more frequent reporting burdens and impose restrictions on cash usage under our ABL Facility.

Our capital expenditures for the nine months ended September 30, 2023 and 2022 were \$2.0 million and \$0.8 million, respectively. We plan to incur approximately \$2 million to \$3 million in capital expenditures during 2023, which includes (i) upgrades to our tracer diagnostics deployment and sampling equipment, (ii) machining equipment at Repeat Precision, (iii) upgrades to our manufacturing and field service equipment to support North American fracturing systems and well construction businesses, (iv) new computers and engineering workstations and (v) software development and implementation.

To the extent we require additional liquidity to fund our capital requirements, including our finance lease obligations, or repay existing indebtedness, we would expect to obtain it through the incurrence of additional indebtedness, the proceeds of equity issuances, or a combination thereof. We cannot provide assurance that we will be able to obtain this additional liquidity on reasonable terms, or at all. Our liquidity and ability to meet our obligations and fund capital requirements also depend on our future financial performance including the ability to manage costs, which is subject to general economic, financial and other factors that are beyond our control. Accordingly, we cannot provide assurance that our business will generate sufficient cash flow from operations or that funds will be available from additional indebtedness, the capital markets or otherwise to meet our liquidity needs. If we decide to pursue one or more significant acquisitions, we may incur additional debt or sell equity to finance such acquisitions, which could result in incremental expenses or dilution.

## **Cash Flows**

The following table provides a summary of cash flows from operating, investing and financing activities for the periods presented (in thousands):

		ıded ),		
		2023		2022
Net cash used in operating activities	\$	(1,446)	\$	(9,036)
Net cash used in investing activities		(1,513)		(440)
Net cash used in financing activities		(1,480)		(2,387)
Effect of exchange rate changes on cash and cash equivalents		(397)		(428)
Net change in cash and cash equivalents	\$	(4,836)	\$	(12,291)

## **Operating Activities**

Net cash used in operating activities was \$1.4 million and \$9.0 million for the nine months ended September 30, 2023 and 2022, respectively. The improvement in cash flow was primarily driven by lower net loss in the first nine months of September 2023

#### Table of Contents

(excluding the non-cash provision for litigation, net of recoveries) as compared to the same period in 2022, as well as the change in accounts receivable for the comparative periods, reflecting lower sales activity in 2023 and favorable collections experience, and lower payments related to cash-settled share-based compensation. Partially offsetting these items was an incremental investment in inventory in 2023.

#### Investing Activities

Net cash used in investing activities was \$1.5 million and \$0.4 million for the nine months ended September 30, 2023 and 2022, respectively, reflecting increases in investment in property and equipment and software and technology.

#### Financing Activities

Net cash used in financing activities was \$1.5 million and \$2.4 million for the nine months ended September 30, 2023 and 2022. Our primary uses of funds for the nine months ended September 30, 2023 and 2022 were principal payments of \$1.2 million and \$1.1 million, respectively, related to our finance leases, payments of \$0.3 million and \$0.4 million, respectively, for treasury shares withheld to settle withholding tax requirements for equity-settled share-based compensation, and payments of \$0.9 million for the nine months ended September 30, 2022 for deferred costs related to our ABL Facility.

### Material Cash Requirements

Except for primarily the Texas Matter and operating lease as discussed in "Note 9. Commitments and Contingencies" to our unaudited condensed consolidated financial statements, there have been no significant changes in our material cash requirements from those disclosed in the Annual Report for the year ended December 31, 2022.

## **Critical Accounting Estimates**

There are no material changes to our critical accounting estimates from those included in the Annual Report for the year ended December 31, 2022.

### **Recently Issued Accounting Pronouncement**

See "Note 1. Basis of Presentation" to our unaudited condensed consolidated financial statements for a discussion of the recent accounting pronouncement issued by the Financial Accounting Standards Board.

## **Smaller Reporting Company Status**

We are a "smaller reporting company" as defined by Section 12b-2 of the Exchange Act, meaning that we are not an investment company, an assetbacked issuer, or a majority-owned subsidiary of a parent company that is not a smaller reporting company and have a public float of less than \$250 million. As a smaller reporting company, we may take advantage of specified reduced reporting and other burdens that are otherwise applicable generally to public companies that do not qualify for the classification, including among other things, providing only two years of audited financial statements.

### **Cautionary Note Regarding Forward-Looking Statements**

This Quarterly Report includes certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements can be identified by words such as "anticipates," "intends," "plans," "seeks," "believes," "estimates," "expects" and similar references to future periods, or by the inclusion of forecasts or projections. Examples of forward-looking statements include, but are not limited to, statements we make regarding the outlook for our future business and financial performance and insurance coverage and appellate prospects for litigation matters, such as those contained in Item 2. "Management's Discussion and Analysis of Financial Condition and Results of Operations."

Forward-looking statements are based on our current expectations and assumptions regarding our business, the economy and other future conditions. Because forward-looking statements relate to the future, by their nature, they are subject to inherent uncertainties, risks and changes in circumstances that are difficult to predict. As a result, our actual results may differ materially from those contemplated by the forward-looking statements. Important factors that could cause our actual results to differ materially from those in the forward-looking statements include regional, national or global political, economic, business, competitive, market and regulatory conditions and the following:

declines in the level of oil and natural gas E&P activity in Canada, the United States and internationally;

oil and natural gas price fluctuations;

significant competition for our products and services that results in pricing pressures, reduced sales, or reduced market share;

our inability to successfully develop and implement new technologies, products and services that align with the needs of our customers, including addressing the shift to more non-traditional energy markets as part of the energy transition;

inability to successfully implement our strategy of increasing sales of products and services into the U.S. and international markets; loss of significant customers;

our inability to protect and maintain critical intellectual property assets or losses and liabilities from adverse decisions in intellectual property disputes;

losses and liabilities from uninsured or underinsured business activities and litigation;

our failure to identify and consummate potential acquisitions;

our inability to integrate or realize the expected benefits from acquisitions;

loss of any of our key suppliers or significant disruptions negatively impacting our supply chain;

our inability to achieve suitable price increases to offset the impacts of cost inflation;

risks in attracting and retaining qualified employees and key personnel or related to labor cost inflation;

risks resulting from the operations of our joint venture arrangement;

currency exchange rate fluctuations;

uncertainties relating to the recent bank failures and Federal Deposit Insurance Corporation response;

impact of severe weather conditions and the Canadian wildfires;

restrictions on the availability of our customers to obtain water essential to the drilling and hydraulic fracturing processes;

changes in legislation or regulation governing the oil and natural gas industry, including restrictions on emissions of greenhouse gases;

our inability to meet regulatory requirements for use of certain chemicals by our tracer diagnostics business;

change in trade policy, including the impact of tariffs;

our inability to accurately predict customer demand, which may result in us holding excess or obsolete inventory;

failure to comply with or changes to federal, state and local and non-U.S. laws and other regulations, including anti-corruption and environmental regulations, guidelines and regulations for the use of explosives;

the financial health of our customers including their ability to pay for products or services provided;

loss of our information and computer systems;

system interruptions or failures, including complications with our enterprise resource planning system, cyber security breaches, identity theft or other disruptions that could compromise our information;

impairment in the carrying value of long-lived assets including goodwill;

our failure to establish and maintain effective internal control over financial reporting;

the reduction in our ABL Facility borrowing base or our inability to comply with the covenants in our debt agreements; and

our inability to obtain sufficient liquidity on reasonable terms, or at all.

For the reasons described above, as well as factors identified in "Item 1A. Risk Factors" in this Quarterly Report and the section of the Annual Report entitled "Risk Factors," we caution you against relying on any forward-looking statements. Any forward-looking statement made by us in this Quarterly Report speaks only as of the date on which we make it. Factors or events that could cause our actual results to differ may emerge from time to time, and it is not possible for us to predict all of them. We undertake no obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future developments or otherwise, except as may be required by law.

## Item 3. Quantitative and Qualitative Disclosures About Market Risk

For our quantitative and qualitative disclosures about market risk, see Item 7A, "Quantitative and Qualitative Disclosures About Market Risk," in our Annual Report for the year ended December 31, 2022. Our exposure to market risk has not changed materially since December 31, 2022.

## Item 4. Controls and Procedures

## **Evaluation of Disclosure Controls and Procedures**

Our management, including our Chief Executive Officer and Chief Financial Officer, conducted an evaluation of the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of September 30, 2023. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer, concluded that, as of September 30, 2023, our disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and that such information is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure.

## **Changes in Internal Control Over Financial Reporting**

There were no changes to our internal control over financial reporting that occurred during the quarter ended September 30, 2023 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

## PART II. OTHER INFORMATION

## **Item 1. Legal Proceedings**

See "Note 9. Commitments and Contingencies" of our unaudited condensed consolidated financial statements for further information regarding our legal proceedings.

## Item 1A. Risk Factors

There have been no material changes from the risk factors disclosed in our Annual Report for the year ended December 31, 2022.

## SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

Date: October 31, 2023

NCS Multistage Holdings, Inc.

By: /s/ Mike Morrison Mike Morrison Chief Financial Officer

(Principal Financial Officer and Authorized Signatory)

## CERTIFICATION OF CHIEF EXECUTIVE OFFICER PURSUANT TO RULE 13A-14(A) AND RULE 15D-14(A) OF THE SECURITIES EXCHANGE ACT OF 1934, AS AMENDED

I, Ryan Hummer, certify that:

- 1. I have reviewed this Quarterly Report on Form 10-Q (this "report") of NCS Multistage Holdings, Inc. (the "registrant");
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
